An overview

The logo-mark

The logo is a universal image that brings a new age edge to our firm, but also is professional and accurately reflects what we do. This particular design brings the element of a star but also includes a series of small check marks within the design.

Check marks have many meanings and symbols; progress, completion, etc. It also relates to the financial services industry; completed the steps in Financial Planning, checking off all of your Risk Management needs, following your progress to financial security and stability.

The check mark is believed to have been created during the Roman Empire. "V" was used to shorten the word "veritas", meaning 'true'. This was used to indicate yes, true, or confirmed on items in a list. This could relate to our "true calling" or "being true to our recommendations".

Logo guidelines

Clear zone

White space is important. Spacing around the logo should be the same width as the star. Do not crowd the logo with text too close to the logo. Keep in mind - this is the minimum. The more white space, the better.

Prevent distortion of the logo

Keep the logo proportionate. Do not squish, stretch or distort the logo.

Imagery

Business style

Most commonly used for:
Recruiting material
Seminar/webinar flyers
General audience marketing pieces

Characteristics
