

Miller Household Risk Review

Miller

Advisor-facing risk review presentation based on saved scenario state.

Premature Death - Protection Gap

Modeled gap: Not calculated

CUMULATIVE SURVIVOR GAP

\$5,957,284

81.7% of lifetime income uncovered

GROUP LIFE (GLI)

\$21,286/yr

Annualized from death benefit @ 5%

PRIVATE LIFE INSURANCE

\$40,121/yr

Modeled for 20 years

TOTAL DEATH BENEFIT

\$800,000

Invested at assumed annual return

HOUSEHOLD INCOME TO AGE 65 — LIFE INSURANCE COVERAGE

ADVISOR NARRATIVE

A protection gap of \$5,957,284 remains after applying existing coverage (\$800,000 total — 16% of the need). This gap represents the income, debts, and goals that would go unfunded if the client passed away today. Private life insurance is designed to close exactly this shortfall — providing the household with the financial continuity to maintain its lifestyle and meet long-term obligations.

Liability / Lawsuit - Asset Exposure

Modeled gap: Not calculated

HOUSEHOLD WAGE GARNISHMENT RISK

\$1,822,963

25% of projected income to age 65 at 3%/yr

NON-QUALIFIED ASSETS AT RISK

\$0

Combined taxable assets exposed to judgment

AUTO LIABILITY COVERAGE

HOUSEHOLD LIABILITY GAP

\$300,000

Underlying household auto policy limit

\$1,522,963

Risk minus auto coverage

LIABILITY PROTECTION STACK

ADVISOR NARRATIVE

A liability coverage gap of \$1,522,963 remains after primary auto and homeowner limits are exhausted. In the event of a major lawsuit, \$0 of personal assets — 0% of the household's at-risk net worth — could be directly targeted by a judgment. An umbrella policy is the most cost-effective way to extend the coverage stack and keep personal assets protected.

Liquidity & Unemployment Risk

Modeled gap: Not calculated

MONTHLY INCOME

\$17K

Current monthly earnings

MINIMUM RESERVE

\$50K

3 months - floor of the goal range

OPTIMAL RESERVE

\$100K

6 months - top of the goal range

ANNUAL INCOME AT RISK

\$200K

Full income exposure during unemployment

CURRENT RESERVE

\$0

0.0 months of income currently held

CASH DEPLETION

Month 1

Months until \$0 savings

TOTAL SHORTFALL

\$60,000

Unfunded gap across modeled period

ADVISOR NARRATIVE

Reserves are projected to run dry in month 1 — before the household is likely to have returned to full income. The total shortfall over the modeled search period

is \$60,000. Closing this gap before a job loss occurs — through reserve building or income protection coverage — is significantly easier than managing it mid-crisis.

 For illustrative planning purposes only.
